Membership Commentary

September 2023

As at 30 September 2023, the number of insured persons with hospital cover was 12,038,013 and the number of insured persons with general treatment cover was 14,661,465. A total of 14,673,886 persons held some form of private health insurance. The proportion of the Australian population with hospital cover was 45.2%, with 55.0% of the Australian population having general treatment cover, and overall private health insurance coverage of the Australian population being 55.1%.

Selected statistics from the data presented in this publication on private health insurance membership are presented below.

For the quarter ending 30 September 2023:

- The number of insured persons increased from the previous quarter from 14,587,495 to 14,673,886 (+0.6%) for all cover, increased from 11,948,443 to 12,038,013 (+0.7%) for hospital cover and increased from 14,575,294 to 14,661,465 (+0.6%) for general treatment cover during the same period.
- The proportion of the Australian population with private health insurance increased to 55.1% for the quarter ending 30 September 2023. The proportion of the population with hospital cover increased by 0.12% to 45.2%, and the proportion of the population with general treatment cover increased to 55.0% during the same period.
- The number of insured persons 65 years and over was 2.45 million representing 20.4% of the insured population, and 53.5% of the Australian population aged 65 years and over. This was an increase from the previous quarter of 22,469 insured persons.
- As at September 2023, 987,904 insured persons were paying a Lifetime Health Cover loading, an increase from June 2023 of 3.3%.
- The average age of insured persons with hospital cover was 42.6. For insured persons with general treatment cover, the average age was 41.3.
- The age cohort with the greatest annual increase in insured persons with hospital treatment cover was those aged 95+, with an increase of 9.786%. The age cohort with the lowest annual increase in insured persons with hospital treatment cover was those aged 0-4, with an increase of 0.049%.
- Hospital coverage increased across all the age cohorts in the year ending September 2023 when compared to the year ending September 2022.

* The family policy types "2+No Adults" and "3+Adults" were introduced in April 2007.

** Clarification of reporting on the PHIA 1 Form by Insured Groups was made by PHIA via Circular No 09/15. It had come to PHIA's attention that reporting of insured groups, in particular the allocation of policies and persons to 'Family' or 'Single parent' and '3+adults' for previous quarters prior to September 2009 was incorrect for some insurers. Variations in reporting appears seasonal in some cases and may be related to movements between student and non-student dependents.

* An artificial increase/decrease is noticed for the table types Hospital Only and Total General Treatment due to the reclassification of these policies under the *Private Health Insurance Act 2007*.

* As at March 2009, PHIAC began collecting data on general treatment policies and insured persons which include ancillary services separately from those which do not. As such, PHIAC A data for insured persons and policies by age cohort now excludes policies which cover hospital substitute, CDMP, and hospital linked ambulance. A break in the time series exists at March 2009, although data from March 2009 onwards will be comparable with data from March 2007 backwards.

Proportion of Australian Population with Cover by Age Cohort As At September 2023

Benefits Commentary

September 2023

The total benefits paid by private health insurance funds for all types of hospital and general treatment services in the year ending September 2023 was \$23.286 billion. This comprised of \$17.05 billion for hospital treatment, and \$6.09 billion for general treatment. Benefits paid increased across all category types, with hospital treatment benefits increasing by 11.6% and total benefits increasing by 10.4%.

Selected statistics from the data presented in this publication on private health insurance benefits are presented below.

For the year ending 30 September 2023:

Hospital Treatment Benefits

- Benefits paid for treatment in All private hospitals (including freestanding day surgeries) totaled \$11.101 billion, an increase of 12.3% on the year ending September 2022.
- Benefits paid for treatment in public hospitals totaled \$1,089 million, an increase of 18.1% on the previous year.
- Benefits paid for treatment in freestanding day surgeries totaled \$541.1 million, an increase of 10.7% on the previous year.
- Private health insurance funds paid benefits of \$2.5268 billion for medical services, an increase of 8.5% from the previous year.
- \$2.335 billion was paid to insured persons for prostheses items, an increase of 9.1% from the year ending 30 September 2022.

General Treatment Benefits

- A total of \$6.09 billion was paid for allied health services in the year ending 30 September 2023, an increase of 6.9% from the previous year.
- Of the \$6.09 billion in allied health services benefits, \$3.32 billion was paid for dental services (+7.6%), \$993 million for optical services (+1.8%), \$310 million for chiropractic services (+5.0%), \$465 million for physiotherapy services (+7.1%) and \$243 million for natural therapies services (+10.9%) when compared to the year ending September 2022.
- Benefits paid for treatment provided in a hospital-substitute setting totaled \$94.3 million during the period.
- Private health insurance funds paid \$51.72 million in benefits for chronic disease management programs during the period.

* Proportion of Total for each column represents the proportion of benefits claimed by members aged 65 years and over for each category type.

Medical benefits means benefits paid under all policies of the fund for services provided as part of hospital treatment or hospital-substitute treatment if a Medicare benefit is payable for the service.

Prostheses benefits means benefits paid under all policies of the fund for prostheses of the kinds listed in the Private Health Insurance (Prostheses) Rules 2007 made under the Act, but only where those Rules provide that there must be a benefit for the provision of the prosthesis in the circumstances specified.

Episodes and Services Commentary

September 2023

Private health insurers paid benefits for 4.64 million hospital episodes in the year ending September 2023, with associated bed days numbering 11.71 million. Of these, 3.94 million episodes (+10.0%) and 8.87 million bed days (+8.0%) were used in private hospitals (including freestanding day surgeries). Public hospitals accounted for 686,941 episodes (+8.2%) and 2.82 million bed days (+12.3%), and freestanding day surgeries accounted for the remaining 669,823 episodes (+6.0%) and 669,823 bed days (+6.0%).

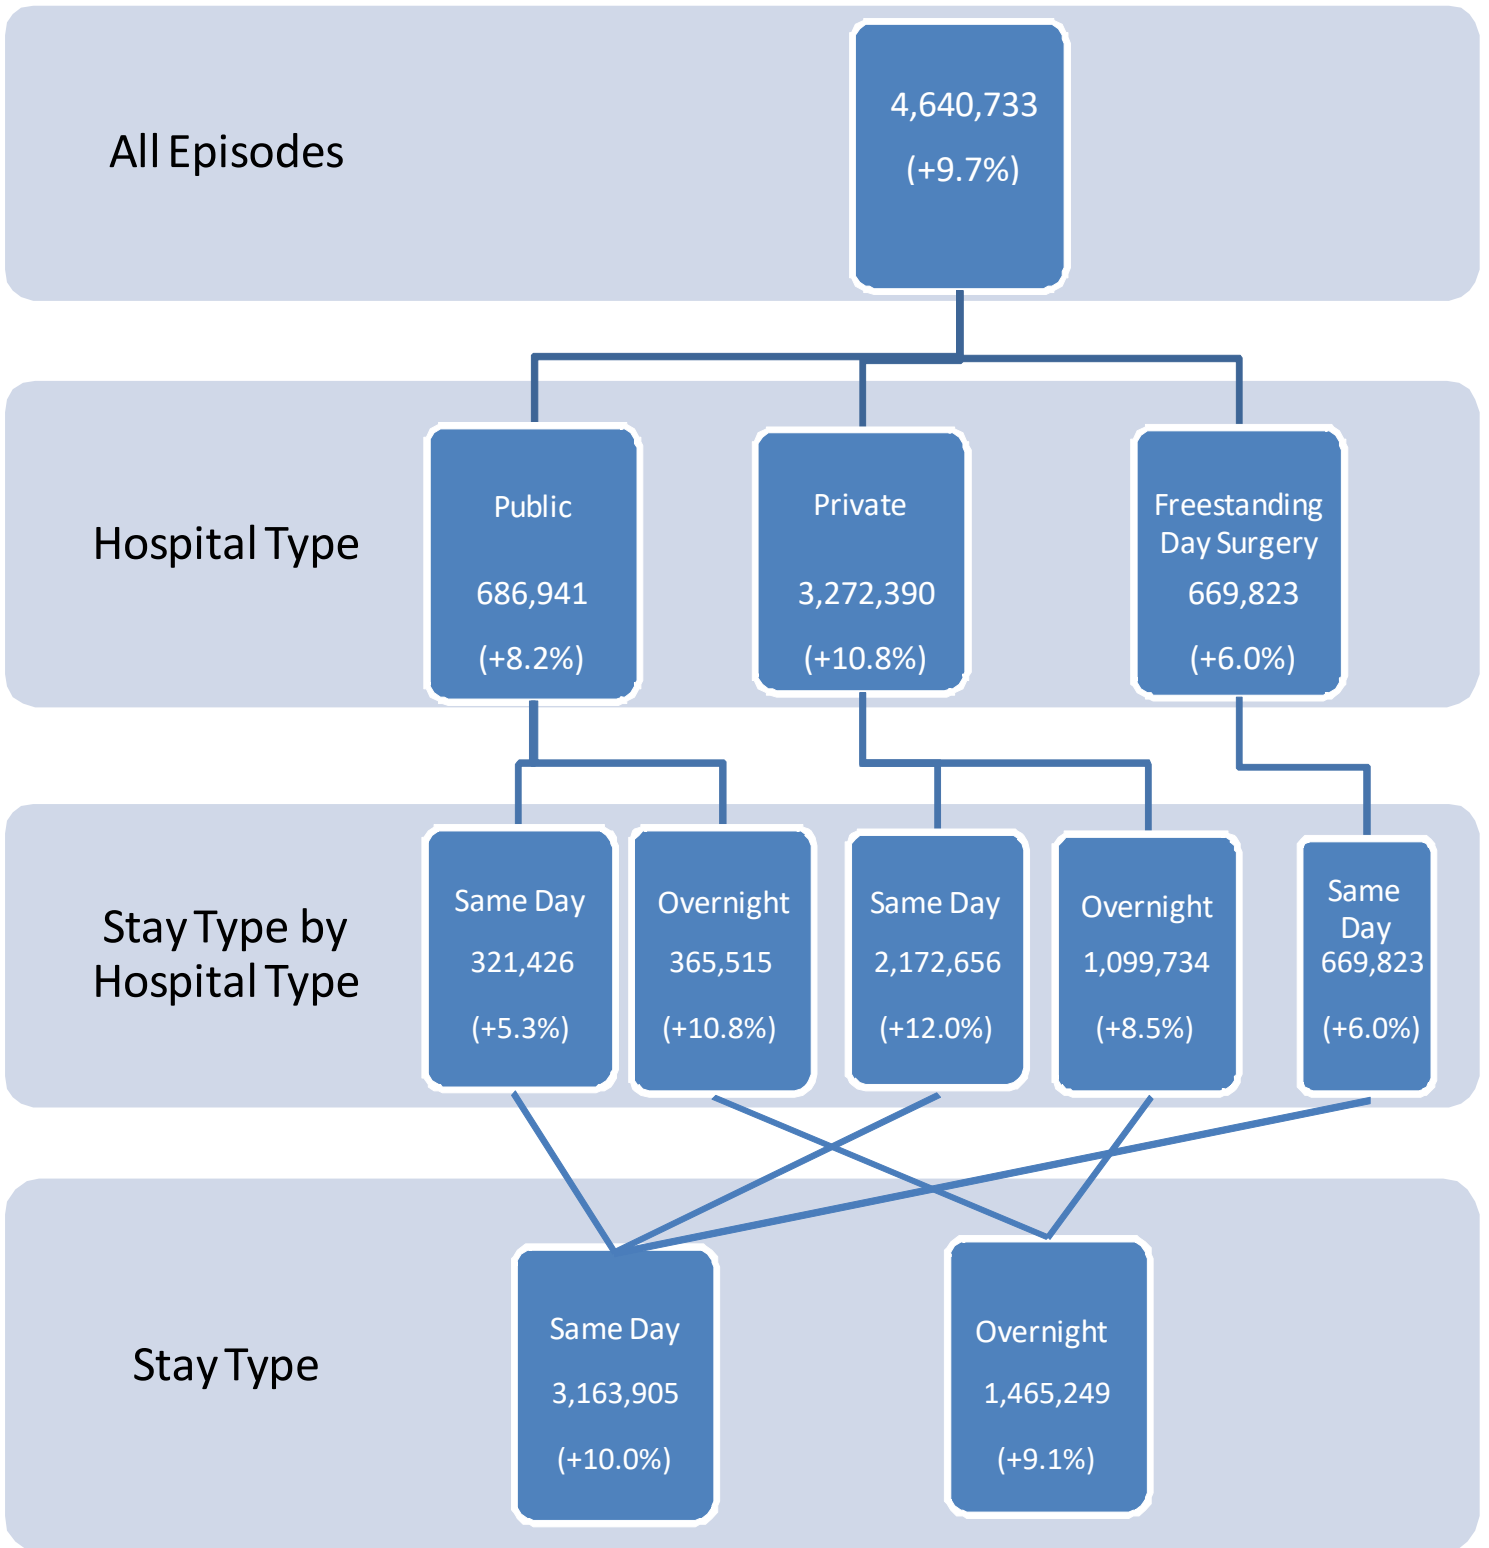

Selected statistics from the data presented in this publication on private health insurance episodes and services are presented below. All percentage change comparisons given in brackets represent the change from the year ending 30 September 2022.

For the year ending 30 September 2023:

- Of the acute private hospital episodes for the period, 2.173 million were same day procedures (+12.0%) and 1,099,734 were overnight procedures (+8.5%).
- Of the acute public hospital episodes for the period, 321,426 were same day procedures (+5.3%) and 365,515 were overnight procedures (+10.8%).
- 68.2% of all privately insured episodes were same day procedures.
- Nursing home type patients accounted for 5,643 episodes during this period. These episodes accounted for 90,760 bed days.
- Private health insurers paid benefits for 39.73 million medical services during the year ending 30 September 2023.
- Of these medical services, benefits were paid on 3.559 million services under a policy with some form of gap agreement. Benefits for 33.17 million medical services were paid under a policy with a no gap agreement.
- 88.2% of medical services had benefits paid with no medical gap during the period.
- Benefits were paid for 3.59 million prostheses items during the period, an increase of 12.5%.
- 298,741 Broader Health Cover services were funded during the year ending 30 September 2023. Of these, 240,825 were for procedures performed in a hospital-substitute setting, and 57,916 were for chronic disease management programs.
- Benefits were paid for 101.580 million allied health services, an increase of 5.4%. Of these, 50.512 million were dental services (+6.2%), 12.331 million were optical services (+0.1%), 9.175 million were for chiropractic services (+3.2%), 11.687 million were for physiotherapy services (+5.4%) and 6.945 million were for natural therapies services (+8.0%).

* Agreement means an agreement entered into between a medical practitioner, within the meaning of that term in subsection 3 (1) of the Health Insurance Act 1973, and an insurer, under which the practitioner agrees to accept payment by the insurer in satisfaction of the amount that would, apart from the agreement, be owed to the practitioner in relation to the treatment provided to the insured person.

* No gap agreement means an agreement where the medical practitioner agrees to accept a payment by the insurer in full satisfaction of the amount owed so there is no gap, or no out of pocket expenses to be paid by the insured person.

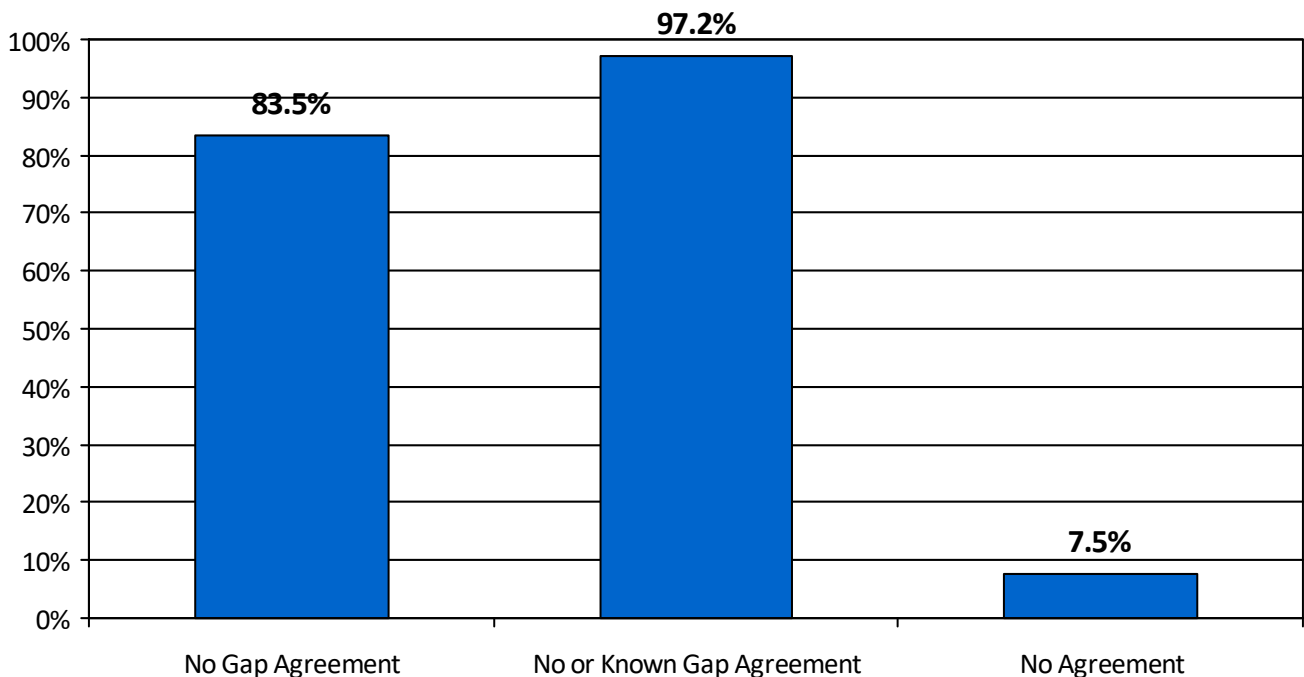

* Known gap agreement means an agreement where the medical practitioner agrees to accept a payment by the insurer in part satisfaction of the amount owed and the patient has provided informed financial consent so that the gap or out of pocket expense to be paid by the insured person is known in advance.

* No agreement is where there is no agreement in place.

** Data was not collected prior to June 2007.

Hospital-Substitute Treatment means General Treatment that:

- (a) substitutes for an episode of Hospital Treatment; and
- (b) is any of, or any combination of, nursing, medical, surgical, podiatric surgical, diagnostic, therapeutic, prosthetic, pharmacological, pathology or other services or goods intended to manage a disease, injury or condition; and
- (c) is not specified in the Private Health Insurance (Complying Product) Rules as a treatment that is excluded from this definition.

Utilisation Commentary

September 2023

Hospital accommodation benefits paid by private health insurers for episodes in freestanding day surgeries in the year ending September 2023 equaled \$808 per bed day and \$808 per episode. Hospital accommodation benefits paid for public hospitals during the same time period equaled \$386 per bed day, and \$1,586 per episode. For private hospitals, hospital accommodation benefits paid equaled \$1,284 per bed day, or \$3,219 per episode. Overall, the average total hospital treatment benefits paid per bed day for a privately insured patient was \$1,456, or \$3,675 per episode.

Selected statistics from the data presented in this publication on private health insurance utilisation are presented below.

For the year ending 30 September 2023:

- Of each hospital episode, an average of \$2,622 per episode was accounted for by accommodation costs, \$544 was accounted for by medical service costs, and \$503 per episode was accounted for by prostheses items.
- The total private health insurance benefits paid per insured person was \$1,605. For hospital benefits paid per insured person, the figure was \$1,434.
- The average length of stay for a public hospital episode was 4.10 days, and for a private hospital episode, 2.51 days. Overall, the average length of stay for an episode in any hospital was 2.52 days.
- The average length of stay for an overnight public hospital episode was 6.83 days. For an overnight private hospital episode, the average length of stay was 5.48 days.
- There were 56 free-standing day surgery bed days utilised during the year ending September 2023 per 1,000 insured persons, with 237 public bed days and 690 private bed days for the same period. Overall, 985 hospital bed days were used per 1,000 insured persons during the period.
- The average benefits paid for an allied health service was \$60, with the average cost per service at \$118. The benefits paid by private health insurers for allied health services represented 50.8% of the costs of these services.
- The average benefit paid per dental service was \$66, with \$81 being paid per optical service, \$40 per physiotherapy service, \$35 per natural therapies service, and \$34 per chiropractic service.
